Configuration:

- The BMA Secur24 Basic is a comfortable "car seat" chair derived from the automotive industry. It has been specially developed for 24/7 use in control centers and observation workstations. The Secur24 Basic provides maximum support and seating comfort for long, concentrated work.
- Equipped with a robust steel construction, a hardened steel block and the specially developed BMA tilting mechanism, the chair can be statically loaded up to 234 kg in challenging 24/7 environments (certificate BS 5459/2 and BMA quality declaration).
- Special "weapon recess" cut out available as an option to provide extra space and seated comfort for personnel carrying weapons, batons, hand cuffs etc.
- Extra thick (11 cm seat / 8 cm back), anatomically shaped upholstery with rounded seat front edges, fixed upholstery, changeable by service staff.
- Seat covers made of robust automotive leather (BC 12 / synthetic leather), combined with e.g. high-quality "Staccatto" fabric with >1,000,000 Martindale cycles or other 24/7 fabric combinations. Also available in a 100% natural black leather execution.
- All adjustment levers are very well accessible (for example, the same operating levers on the left and right side) for a quick, individual adjustment.
- The Secur24 Basic has various options (see BMA price list) that can be selected to customize the chair (e.g. head rests, coat hanger, cardan extension, protection covers) and can be configured according to the requirements of the users.
- Hygiene accessories such as head rest and seat / back covers, disposable non-woven covers for the head rest. Easy cleaning of the chairs due to high-quality materials.
- 36 months full factory warranty based on 24/7 use. Full warranty including all parts, travel and labor costs. Repairs are carried out by BMA service specialists on site (see BMA warranty conditions).
- Certificates: BS 5459/2 (strength / load bearing capacity), GS-mark (tested safety), LGA pollutant tested (eco-label emission and harmful substances), EN 1335 (GS mark, dimensions, strength and safety), BMA quality declaration (current quality and stress tests).
