Coathanger

Protection cover seat / back

Removable and washable headrest cover

Disposable hygienic cloths for headrest

## Configuration:

- The BMA Secur24 Exclusive is a comfortable “car seat” chair derived from the automotive industry. It has been specially developed for 24/7 use in control centers and observation workstations. The Secur24 Basic provides maximum support and seating comfort for long, concentrated work.
- By using extra thick ergonomically shaped cushions, a height and depth adjustable pelvic support, a reinforced mechanism and a large foot base, this robust 24/7 chair is particularly suitable for use in observation and surveillance work.
- The Secur24 Exclusive is very flexible and modular to configure (top, gas lift, armrests, leather protector, cardan extension, etc.) and easily adjustable to the requirements of the user.
- Upholstery standard of robust “car leather” (BC 12 / imitation leather), combined with the extremely strong and easy to clean fabric “Staccatto” (>1,000,000 Martindale). You can also choose from other sustainable 24/7 fabrics or opt for a 100% natural leather variant.
- Thanks to a robust steel construction, a hardened steel block and the BMA tilting mechanism, this specially developed 24/7 seat can be statically loaded up to 234 kg (Certificate BS 5459/2 and BMA quality declaration).
- 36 months full factory warranty on parts, labor and call-out costs. Guarantee based on 24-hour occupancy, 7 days per week. Repairs at customers are carried out by our BMA Services specialists (see BMA warranty conditions).
- The chair meets the following standards and certificates: BS 5459/2 (strength / load capacity), GS (safety), EN 1335 (dimensions, strength and safety), ergonomics (TÜV Rheinland certified), BMA Quality certificate (continuous quality and load tests), ISO 9001, ISO 14001.
