# OUR SCOPE OF SERVICES IN CONTROL ROOMS

## 24/7 Control Room Consoles

Ergonomic Sit-Stand Consoles with individual adjustment options and perfect integration of built-in IT appliances guarantee a safe and efficient workplace concept for critical areas of application.

## Engineering Consoles

Standard-compliant and easily upgradeable consoles with spacious technical substructure for versatile applications in demanding industrial areas.

## Supervisor Consoles

A wide range of products for various areas of application ensures an application-optimized solution, which can be retrofitted and upgraded at any time, for a future-proof control room.

## Monitor Walls

Individually configurable monitor wall structures offer a stable and maintenance-friendly mounting of large screens. Electrically height-adjustable monitors, front access and more innovative details can be found here.

## Crisis Room Conference Desks

From the beginning in the planning, manufacture and assembly phase of your individual conference desk solution we consider innovative functionalities, standard-compliant ergonomics and sophisticated design.

## Server Room and Configuration Workplaces

Cost-effective, height-adjustable console desks made from high-quality Materials such as aluminum die-cast profiles stand for highest durability and safe investment.

# COMPLEMENTARY EQUIPMENT

## Cable Management and Power Distribution

The special mechanical and electromagnetic requirements for power, network and audio/video cables are considered during the product development, in order to achieve a maintenance-friendly and a safety regulations compliant solution. This scope also includes intelligent power distribution units (PDU), uninterruptible power supplies (UPS) and products for remote control of keyboard, video and mouse (KVM). All from a single source.

## Acoustics

Ergonomics guidelines recommend a noise level for offices and control rooms of 35-40 db(A) and it should not exceed 55 db(A). Through the correct use of materials and a preventive room planning by our workplace experts an acoustically optimized environment will be created.

## Contract Furniture

With an extensive range of high-quality and robust cabinets and shelves, our contract furniture offers a useful addition to the control room consoles. Individual solutions for your project will be considered and adapted to the room conditions.

## Ergonomics

Technical workplaces, although in the production or monitoring area, are to be understood as a place of added value. Increasingly advanced manufacturing methods optimize automated work, but also the human-machine interface must be considered. Ergonomic design aims at an integrative view of this system and its holistic optimization. Norms and standards provide a basic orientation aid in this respect.

## Lighting

Both, direct glare and indirect glare should be avoided with professional workplace lighting. We take into account a coordinated combination of indirect uniform room illumination plus individually adjustable worktop lighting.

## Knürr Dacobas® - Desk and Workbench Systems Strong points

Office organisation and technical integration are enabled with a wide range of individual, configurable desk pedestals.

- 1 Desks are afforded a high load rating with a strong (50 mm) steel frame and a postformed desktop (70 mm).
- 2 The patented quick connect system guarantees simple and strong link-up of desk, cabinet and corner elements.
- 3 An easily assembled cable duct provides covered vertical routing of data and power supply cables.
- 4 Tapped thread in the top end of the extrusion allows adapters to be mounted for practical accessories.
- 5 Additional work and storage surfaces are created with desktop superstructures. A simple plug/screw connection enables vertical link-up for workstation superstructures, e.g. a second working level or lighting fixtures.
- 6 Cable Routing Set (CRS)  
Quick and easy cabling with the cable routing set in the vertical cable duct under the worktop.

All workstations are also available in ESD version as required.

# MODULAR ELECTRONIC WORKSTATIONS

# MODULAR WORKSTATION FOR ELECTRONICS ENGINEERS

Combinable modules, that meet all technological requirements with numerous practical features!

### **Experience, know-how, competence:**

For over 25 years Knürr has been a recognised specialist for electronic workstations for applications in the electronics industry, automotive engineering, medical technology, and research and development.

### **Configurations for individual requirements:**

- Test and service
- Assembly and production workstation
- Training and instruction workstation
- Development workstation

### **The Knürr Electronic Workstation is a modular workstation system, that grows with changing requirements:**

A continuous evolution of the technology to be integrated requires a high degree of flexibility with workstation superstructures.

From the basic version with integrated horizontal cable duct through to a high-end solution with additional electronic mini distributor rack and/or Knürr Rapomos® equipment carriers as workstation components.

The mature Knürr workstation systems, Dacobas® and Elicon®, can fully integrate their strengths here, which have been continuously further developed over many years.

In addition to its tried, tested and proven modularity, the Electronic Workstation also consistently meets workstation-specific ergonomic requirements.

## Knürr Dacobas®

### Standard desk with:

- Integrated, horizontal cable duct (accessible from above)

### Additionally with:

- Top-mount extrusions
- Electronics mini distributor rack

### Additionally with:

- Knürr Rapomos® Equipment Carrier
- Underfit lamp

### Additionally with:

- Pedestal drawer unit

- When computers go crazy, alarm systems no longer function or cash registers simply refuse to work, the gremlin at work is quite often easy enough to identify: Static Electricity.
- The constant development of highly integrated circuits results in increasingly more efficient (but also increasingly smaller!) equipment. Therefore it is all the more important to determine the growing sensitivity of **electrostatic sensitive devices (ESD)**. Even voltages of just 100 – 200 volt are enough to damage microprocessors or MOSFETs.
- High voltages are often triggered by modern plastics, artificial fibres in clothing and carpets, and by low humidity in centrally-heated rooms.  
Depending on the shoe material, speed and humidity, a person walking across a carpet can be loaded with between 2000 and 20,000 volts.
- There is no doubt about it! The safety of electronic components (not to mention the well-being of the operating personnel) can no longer be guaranteed under these conditions.
- In order to safely neutralize static charges at non-hazardous currents, the electric resistance between the respective component and ground must be between 1MΩ and 1GΩ. Worktops made from electrically conductive particle board and special conductive HPL-surfaces offer this defined conductivity. Further we recommend to always connect work-places via a 1MΩ Safety Resistor to building-earth in order to avoid possibly inaccurate earthing resistances on building level.
- With the **ESD workstations from Knürr**, the perfect operational workstation equipment is now available.

- Site insulation in accordance with VDE 0100, § 24 and DIN 57 680 part 2.
- Protection of electronic components against static electricity (EN 61340)

ELI00473

- The Basics**
  - Generation of electrostatic charges cannot always be prevented. Therefore the discharge must be specifically “influenced”. Influenced means: All discharge processes must be run controlled and calculable.  
The calculable discharge process is described by the following exponential function:

$$U(t) = U_0 \cdot e^{-t/RC}$$

- U<sub>0</sub> = Initial voltage of the capacitor
- R = Leakage resistance
- C = Capacity

- By activating the equation towards R, an equation is generated with which an ideal leakage resistance can be ascertained.

$$R_0 = \frac{t_{zul}}{C \cdot \ln(U_0/U_{zul})}$$

- The optimal discharge curve is consequently achieved. Assuming that the voltage (U<sub>0</sub>) must be reduced within 0.1 sec (t<sub>zul</sub>) to 50 V (U<sub>zul</sub>) so that the electrostatic endangered components are not under high voltage for too long, the leakage resistance therefore acts as the regulator for a controlled discharge.

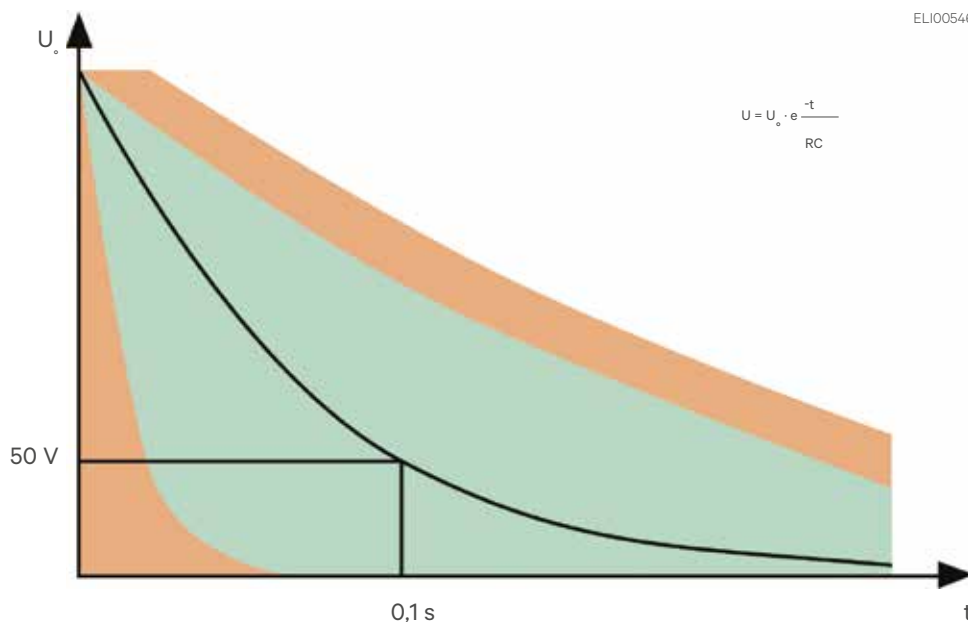

- Of course, for the safety of the endangered components it is also helpful if charges can be prevented before they are generated by equalising the different potentials. Conductive work and unit surfaces, plastic parts made of conductive materials, the connection of all parts with one another and with the ESD body are all required for this purpose.

\*Electrostatic discharge

- Easily accessible connections for ESD potential equalization, e.g. for measuring and soldering equipment must be available at each workstation. A cable is provided for the safe connection between workstation and ESD potential equalization.
- Easy release connection points for wristbands and other potential equalization conductors are also provided.

### Discharge curve of electrostatic charges

- Also included in safeguarding equipment are drawers and storage spaces inside and outside which are made of conductive material for further preventing charges from building up.
- With Knürr ESD workstations, all the necessary requirements are satisfied. For this very reason, both the complete workstation itself and work pieces, tools and operating personnel are all on an equipotential line. If potential differences occur as a result of rubbing or for whatever other reason, safe charge equalization or charge dissipation via earth is implemented immediately.

#### • Conductive materials

- Last, and certainly by no means least, the safety equipping of Knürr ESD workstations has been made possible with the advances in the development of conductive materials (plastics, laminates, paints). Thanks to these materials we can now successfully unite both **ergonomic requirements** and **modern design** and **safety** in one system.

#### • Diverse areas of application

- Highly sensitive components do not require just direct protection at electronic workstations; the safety equipping of all other work areas is just as important in this respect. They must also be equipped with conductive desks, chairs, racks, transport trolleys and containers.

If you follow the path of electrostatic endangered components via transport – laboratory – test area – production

- goods output control – packaging through to dispatch, it soon becomes evident that ESD room equipment and ESD accessories have become an indispensable necessity.
- Each of these stations is a part of the quality chain, and as with every chain, a single weak link nullifies the capacities of the other segments.

- **Knürr ESD workstations provide a comprehensive safety solution to ensure efficiency**

## Workstations, integral planning

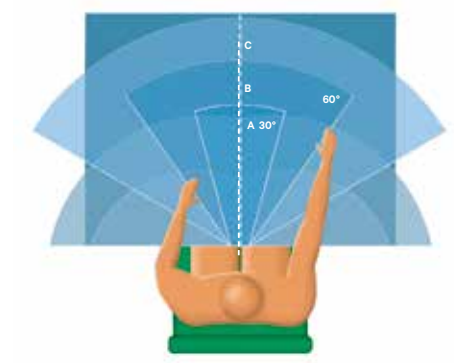

### ERGONOMICS

The demands made on modern, ergonomic workstation designs are forever increasing. This is because the design of the working environment, among other factors of course, influences the worker's performance and motivation.

We at Knürr therefore concentrate on occupational medicine know-how in the development of our products. In doing so, Knürr makes a significant positive contribution to the dynamics, efficiency and creativity in the

work process. Scientific studies show that ergonomically well-designed workstations reduce the number of days people cannot work or are ill.

The in-depth expertise of our qualified workstation experts guarantees that every single aspect of ergonomics and modern room planning is covered.

A: Optimal field of vision  
B: Maximum field of vision without moving your head  
C: Enlarged field of vision including proper head movement

# KNÜRR DACOBAS® ELECTRONIC WORKSTATION

143 to 160

## Knürr Dacobas® Electronic Workstation Strong points

### Vertical and horizontal cable routing in cable ducts

- 1 The spacious horizontal cable duct of the basic version can be used for cabling and installing electrical components and socket strips.
- 2 Easy cabling and equipment fitting supported by the self-holding cableduct cover. Dust-protected cable entry with brush strip across the entire desk width.

The Knürr Dacobas® Electronic Workstation can be optionally extended with a vertical cable duct on the extrusion.

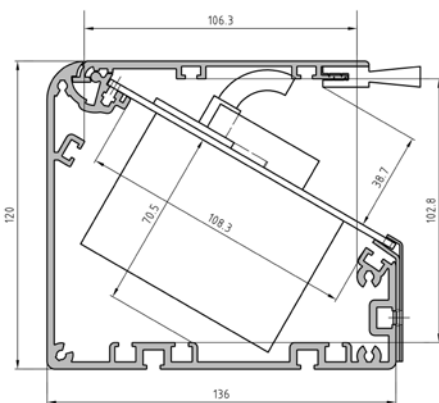

### Superstructures

- 3 Additional work and storage surfaces are created with desktop superstructures. A simple plug and bolt-connection is used here for vertically linking the desktop superstructures (Knürr Rapomos® equipment carrier, electronics mini distributor rack, lighting fixture and storage tray). Later installation and fixing of the components is also possible at any height with patented spring-nut and slot system.

## Electronic Workstation Strong points

Building one onto the other, the modules of this workstation system meet the numerous technological requirements in a very intelligent way.

- 1 Depending on the special requirements, the Electronic Workstation is based on the Knürr workstation systems, **Dacobas®** or **Elicon®**.  
In accordance with respective requirements, a 4-foot system configured for high static loads (Dacobas®) and a height adjustable C-foot system (Elicon®) are available to choose from.

Optimization of the space requirement and costs of integration of the electronic components in the:

- **Cable duct**  
Mounting electronic components and socket strips
- **Electronics mini distributor rack**  
For electronic components up to 91 mm installation depth in the horizontal pitch raster
- **Knürr Rapomos® equipment carrier**  
For electronic components over 91 mm installation depth in the horizontal pitch raster or 19" raster
- **19" pedestal drawer unit**  
Fixed mounted pedestal drawer unit for mounting 19" components (Can also be mounted later at various positions)

- 2 Configuration made easy! Individual lab workstation with a **Knürr Rapomos®** equipment carrier and/or a Knürr mini distributor superstructure.

- 3 Electronic components are protected by completely conductive workstations in accordance with ESD Standard.
- 4 Various integration levels of all components can be delivered on request with partial wiring through to complete wiring for immediate start-up.
- 5 Horizontal cable duct already preassembled in the basic version.
- 6 Quick and easy integration of TFT monitors in all standard sizes and levels.

## Single Desk, With horizontal cable duct, optional ESD

- Single desk with 4 legs
- Extruded aluminium with 3 T-slots on each side
- Worktop with aesthetic 70 mm postformed edge at the front
- Desk frame with integrated mounting for 19" pedestals, office pedestal units and horizontal cable duct
- Rear-side spacious horizontal cable duct, accessible from above
- Horizontal cable duct for mounting electrical components
- Horizontal cable duct with self-holding cable duct cover
- Cable duct cover with brush strip for cable entry
- Cable duct and cable duct cover antistatic coated
- Brush strip provides dust protection in the cable entry area in the horizontal cable duct
- Complete cable routing is also possible with workstation link-ups in the horizontal cable duct
- Prepared for socket strip installation
- Rear legs can be extended at any time for mounting vertical cable duct, lights, Knürr Rapomos® mini distributors, flat screens and shelves

### ESD:

- Discharging electrostatic charges

### • Load rating

- 1500 N (static surface load)

### • Standards

- DIN 68761 for worktops
- EN 438 class for coating material

### ESD:

- EN 61340 for electrostatic

### • Material / Finish

- Legs: extruded aluminium, powder-coated texture
- Worktop: three layer particle board, FP/Y E1 version, fire protection class B2
- Worktop coating: high pressure plastic laminate
- Horizontal cable duct and cable duct cover: extruded aluminium, powder-coated, antistatic texture
- Desk frame: sheet steel, zinc-passivated

### ESD:

- Worktop volume conductive
- Work surface conductive

### • Color

- Legs: RAL 5008, grey-blue
- Worktop and frame trims: light-grey
- Cable duct and cable duct cover: RAL 7035, light-grey, antistatic

## DISPLAY MOUNTS FOR CONSOLES

213 to 218

## Monitor Mounts - Functional Rails

Flat screen monitors are the main interface in today's control rooms between operator and system. According to ergonomic principles, monitors should always be easily adjustable towards the user and allow for quick change in order to reduce maintenance time to a minimum.

Dacobas Advanced Control Room Consoles can be equipped with the following monitor mounts while keeping all flexibility:

### • Functional Rail on Dacobas Profile Extensions

- Large range of accessories like monitor arms, lighting, and much more make the Functional Rail a versatile platform. Mounts between two vertical profiles and a perforated rear panel.

### • Functional Rail Add on Monitor Level

- Besides the various options of the standard Functional Rail, this version also offers an electric height adjustment in option. This allows a better view on videowalls behind the console.

- For additional information see also our catalogue "Ergonomic Flat Screen Supports".

### • Surface

- RAL 6009 White aluminum

# WORKPLACE LIGHTING

219 to 228

## Levels Of Workplace Lighting

From an ergonomic point of view a workplace structures in several access areas. Knürr divides these in three different areas:

- **Task**
  - Area of immediate manual activity. Space for mouse, keyboard, writing utensils and communication devices. Task lights are meant to selectively illuminate the area directly in front of the operator. This light shall not affect other workstations and can be dimmed and adjusted.
- **Workstation**
  - Area of immediate manual activity and furthermore the complete remaining work surface of the console. Installed with overhead extension arms or as underfit lamp. Light sources allow 500
- **Room Level**
  - Ceiling-mounted lamps are of advantage for an unobstructed view to a monitor wall. These overhead lamps illuminate the console with direct and indirect light and subsequently can be integrated in the room illumination. GST18 connector system, DALI and radio control allow for an easy installation.

Workstation

Knürr Console LED

**Highest Quality Of Light**  
The light dimming function adapts the amount of light to individual needs. Planar, homogeneous and flicker-free light relieves the eyes during work. Possible disturbing reflexions on bright surfaces are avoided with glare control.

**Task-oriented Technology**  
Knürr Console LED provides high illuminance and absolute glare-free illumination for perfect light at the workstation. The enclosed lamp housing with a flat and compact design prevents the intrusion of dirt and is easy to clean.

- Utmost homogenous glare- and flicker-free light
- Light output through parabolic louver for perfect glare suppression
- Continuously dimmable with lamp-mounted or remote switch
- Robust aluminum enclosure

- **Finish**
  - Hard anodized white-aluminum

## Workstation

### Knürr Lumax LED Lamp Workstation or system installation

- State of the art LED-Modules for highest efficiency
- Glare free
- Photometric properties checked according to DIN EN 13032-1
- Overdimensioned LED-Modules allow for dimming in the first years of use and thus grant extremely longevity
- Dimmable with „Touch DIM“ feature via push button on the lamp or at tabletop
- Perfect fit for Knürr's consoles (adaptors for Knürr's multi functional rails)
- 20° tiltable

### Knürr Control LED remote

Modern workstation illumination are almost always controlled from a control panel below the tabletop front edge. The Knürr Control LED remote works without control cable from console to room ceiling by use of the Europe-wide approved 868 MHz standard (not susceptible to interference).

The usual control panel gets replaced by an identical unit with built-in radio transmitter. One or more room lights can be controlled from one control panel or also, several control panels can have access to the common room lighting.

- **Technical Data**
  - Connection: 220 – 240 V; 50/60 Hz
  - Radio frequency: 868.3 MHz
  - Connection: Schuko (control panel)
- **Supply Schedule**
